Description :

Prsentation de l'diteurSHORTLISTED FOR THE MAN BOOKER PRIZE 2012For half a century Audrey Death has been in a state of semi-consciousness. Severed from the world of the living after falling victim to Encephalitis lethargica, she has languished in Friern Barnet Mental Hospital. Then, in 1971, maverick psychiatrist Dr Zack Busner arrives.Audrey's experiences of a bygone Edwardian London: her socialist lover, her involvement with the Suffragists, and her work in a munitions factory during the First World War, alternate with Dr Busner's attempts to bring her back to life with a new and powerful drug. His investigations lead to revelations that are both shocking and tragic, and which will return to haunt him decades later.Revue de presseA dazzling feat of imagination and structure: a sprawling, lyrical, stream-of-

consciousness narrative that squares up to modernism and brings it kicking and screaming into the 21st century ... stomach-lurchingly ambitious. --ObserverUmbrella is such a linguistically adept, emotionally subtle and ethically complex novel that this could and should be his year. --GuardianFew writers would have the artistic effrontery to offer us a novel as daring, exuberant and richly dense as Umbrella. Will Self has carried the Modernist challenge into the twenty-first century, and worked a wonder. --John BanvillePresentation de l'diteurSHORTLISTED FOR THE MAN BOOKER PRIZE 2012For half a century Audrey Death has been in a state of semi-consciousness.
